Entered at the Postoffice at Honolulu as second-class matter.

MARCH 18, 1912

An American Citizen of Panama distant, and there's really no use in reminded that the Italo-Egyptian trying to worry now over what will not publish anonymous communications.

Now that Doc Wiley has quit, Secretary Wilson will have to dig up me other kahuna for the Department of Agriculture.

With the tariff as the bone-of-contention between the two parties, the chances of solving the high cost of living are quite remote.

What a difference there appears to be in the methods employed by the English women and the American men to win the ballot.

The local Democratic political pot started to boil, notwithstanding old saying. But then, see some fuel that is being used.

According to the look of things in Democratic delegation, Link seems to be in a fair way to bring that "Beautiful Isle somewhere."

A contemporary says that Roosevelt would not ignore his countrymen. Certainly not. Even whisper could receive the promptest attention.

This month next year somebody will taking the oath of office as President on the steps of the Capitol. But think of all that is going to happen between now and that time.

Punahoa athletes are doing their best to keep up the reputation of their school. It is up to the wealthy alumnus to do their share by giving the \$300,000 endowment so richly deserved.

Don't let Congress and the sugar tariff joggle get your mind from the fact that there are not less mosquitoes here than a few months ago keep up the good work of eradication.

Kahului's breakwater has just been finished in the usual Maui way. No one killed, no serious accidents, nothing but just straight business and a task completed on time of a little before.

President Taft resorts to no political tricks. He is of the opinion that results properly presented should command the confidence and support of the American people, and they will stand behind him.

Notwithstanding the Mahukia strike, and the threatened sugar tariff cut, the city notes with pleasure that the plans for the harbor front improvement are meeting with approval all along the line.

The gang of boys in the second-story window of the Y. M. C. A. would do well to note that a person caught with a bean-shooter in Kansas City liable to a fine of ten dollars. The same law might work well here.

## WHAT HAWAII BUYS OF MAINLAND.

In the twelve months ending with December last, the shipments of domestic merchandise from the mainland of the United States to the Territory of Hawaii were valued at \$21,917,747. This was an increase from \$18,661,729 for the same period in 1910 and from \$20,637,751 in 1911.

You are very safe in figuring that free sugar won't be in force as long as the Brussels convention lives. The end of that convention is five years

New York and three millions through the Puget Sound ports.

During the same period the Territory sent to the mainland merchandise valued at \$48,058,117, of which sugar was valued at \$42,228,426, and \$2,590,000 pineapples and fruits.

This shows a large balance of trade in favor of Hawaii, which is cheering. But what our mainland friends have to bear in mind is that the passage of the free sugar bill will practically wipe out this source of profitable trade.

Free sugar means annihilation for the sugar industry in Hawaii and all other parts of the United States. Pass the House free sugar bill and these islands will be so destructively assaulted that the pineapple and fruit industry would be the only mainstay, and its two million dollars of business would be the basis from which to figure Hawaii's future prosperity and purchasing power.

No man on the mainland who now does business with Hawaii, should be found among the supporters of the Underwood bill.

## OLONGAPO GIVEN AS DESTINATION

(Continued from Page 1)

most continuous and reflecting great credit on the executive dispatch of the local yard officials.

Target practice will be held about May 1. The cruisers will make twelve kinds of training, and at this rate they will reach Guam in a trifle under twelve days. After a short stay at Guam for coaling purposes, the ships will proceed to Olongapo, which is about sixty miles from Manila, and about 4850 from Honolulu. Admiral Southerland this morning sent a note to Postmaster Pratt, offering to transport any mail matter which he might have on hand for Guam. This will be a big improvement on the regular schedule.

Lieutenant Commander Leahy, fleet ordnance officer, has received a 10-day leave plus travel time, in order to visit his family on the Coast. He leaves Wednesday on the *Sierra*, and will cross to Hongkong after a week's stay in San Francisco, on a Pacific Mail liner. In plenty of time to put the cruisers through their paces in preparation for target practice.

The marines who have been in camp at Schofield for annual small arms practice, rejoined their ships last night. Major Hill, fleet marine officer, stated today that more than 50 percent of them had qualified for marksman, an unusually large proportion of an entire command. The sharpshooter course will be shot off at Olongapo if possible.

When the Superintendent of Public Works indicates his belief that the Panama Canal won't do much for Hawaii, isn't it about time to have a new Superintendent of Public Works who understands the future of Hawaii and is big enough to build for the future by improving Honolulu harbor?

## WATER METERS AND HOMES.

Extension of the water meter system to the residential districts of this city is certain to result adversely on the health of the population.

It isn't the man who can afford to pay for water without limit who will be hurt, but rather the small householder, the frugal man who has to count every penny of household expenses, and at the same time enjoys such attractive premises as a liberal supply of water at a low rate will give him in Honolulu.

Water used on the lawns and gardens of the small house lots through the city is not wasted. The city cannot make a better investment for the common good than to give such people all the water they want at the very lowest possible figure.

To put in meters means that the lawn and the garden, which is now a luxury that can be afforded, will have to be left to entire dependence on the rainfall. That will finish Honolulu Beautiful.

Water meters in manufacturing establishments and tenements where careless tenants leave the taps open for the water to run into the sewer, will reduce the criminal waste of water. A greater mistake could not be made than to extend meters to the residential parts of the town.

In the twelve months ending with December last, the shipments of domestic merchandise from the mainland of the United States to the Territory of Hawaii were valued at \$21,917,747. This was an increase from \$18,661,729 for the same period in 1910 and from \$20,637,751 in 1911.

Of this business, over \$14,000,000 was handled through the port of San Francisco, over four millions through

## CUMMINS BLOCK SET AT \$87,438

(Continued from Page 1)

stripes only run a depth of thirty-three feet, however. The land that is left in the center of the Cummins property he stated was only worth \$2 per square foot.

Here is where the trouble began when kept on insisting that the witness should say why he divided the land up in this fashion, and Wilder kept answering that he placed his valuation on the whole property and that if this did not suit the attorney, then he could redivide it in any way that was agreeable to him.

## Far Better

Fresh milk, absolutely pure and rich, is superior in every way to the best of preserved milks.

Fresh milk is Nature's own food, and the milk supplied by us is absolutely pure and very rich. One trial will convince you.

## Honolulu Dairymen's Association

Phone 1542

Bubbles: Are you a resident of this charming little suburb?

Stubbs: Oh, no! I've been well that's the reason I took that way.

"Pray, what do you suffragettes play at your social meetings if not indignation?" We play pokerface, answered the most manly of the tailored group.

The Father: But what special qual-

ities has your school that might interest my son?

The Principal: Just tell him that we overlook the Human and non-attendance of classes.

Farmer A: I hear that your son has made his way to the front in Hawaii.

Farmer B: I heard say he has. He started in as a conductor on a street

car and now he's a midman.

The Father: But what special qual-

ities has your school that might interest my son?

The Principal: Just tell him that we overlook the Human and non-attendance of classes.
